

Sweat helps release toxins from body and tends to be a marker for the active bunch to judge the hard work done during the day.

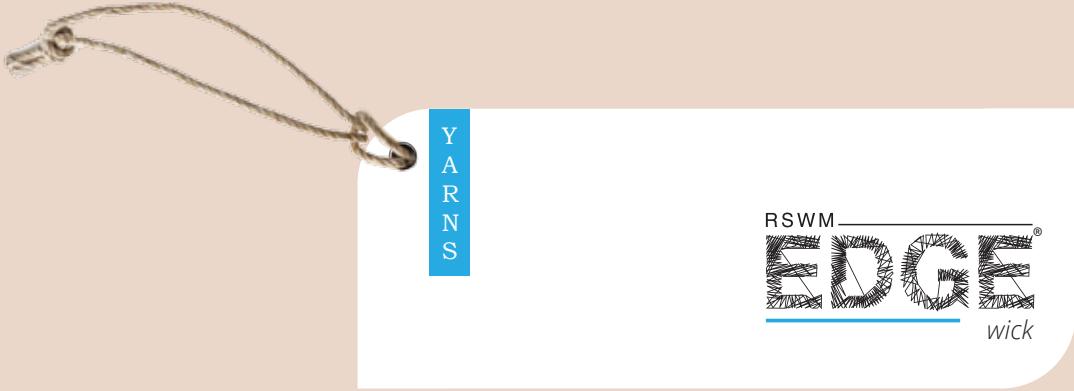

But sweat patches are undesirable and sweat makes clothes weigh down and cling to the body. An active lifestyle can be achieved without the uncomfortable filament T-shirt and the bother of problems associated with sweat.

A day out at the golf course, or a trek, or hike or yoga for that matter, where breathable clothes are desired, do not worry about the discomfort from itchy t-shirt and sweat patches. RSWM EDGE™ Wick yarns got you covered.

High grade, permanent, inherent properties spun with complexity for garments that feel comfortable all the time, every time. Feel good as new, with long lasting moisture management that won't fade with increasing number of washes, wicks sweat away from your body and evaporates it at the surface of your clothes. RSWM EDGE™ Wick yarns help beat the prickly heat of the hot zones.

“Moisture management properties right down to the fibers so a fresh breezy coolness dawns, that lasts for the entirety of the garment's life.”

Size of hang tag:  
1.45" X 3.74"

Rules of acquiring tags:

5 HT/kg for garments that contain at least 50% RSWM EDGE™ Wick yarn.
